
Demonstration & Used Machines Directly from Manufacturer

Slow Speed Shredder (track mounted-severe duty)

for Waste, Bulky Waste, Mattresses, Plastic Film, Timber, Stubs

Type: Crusher HL II 1622
Serial No.: 11 159
Built in: 2008
Working hours: approx. 538
Weight: approx. 28.500 kg

Accessories: Tracked drive, remote controls, magnetic separator, 2-way-fan, ejection plates for eject material, painting RAL 1028, bolted tools for mixed materials

Factory checked: Factory checked:
New conveyor belt, new overband magnet, track mechanism with new chain, rotor bearing replaced, crusher shafts and tools re-armour plated, machine completely re-painted

Warranty : 1 year

Slow speed Shredder :

The machines and installations of the HL-series are fed through a hopper and crush the material to be processed by two slowly counter-rotating shafts.

The high wear and tear resistant cutters are firmly welded and reach a long service life. The service life of the construction components is an essential quality feature. The material to be shredded can be size reduced to the desired particle size via various reshredding bars. An L-shaped discharge belt in a safe distance from the cutting system ensures a trouble-free transport of the shredded material.
